b. **Misprision of treason**, of felony: originally, an offence or misdemeanour akin to treason or felony, but involving a lesser degree of guilt, and not liable to the capital penalty. As various statutes enacted that concealment of a person's knowledge of treasonable actions or designs should be regarded as *misprision of treason*, this term came to be used as the ordinary designation for such concealment.

Hence it was often supposed that the word *misprision* itself expressed the sense of failure to denounce a crime. This imagined sense Sir E. Coke (followed by Blackstone) attempted to account for etymologically, assuming that the word was derived from the OF. *mespris* (mod.F. *mépris*: cf. MISPRIZE v.1 and v.2) neglect, contempt.

Miss (mis), sb.¹ Forms: 3-6 mis, mysse, 3-7 misse, 4-5 mys, (5 mysse, 6 myshe), 6- miss. [Partly f. *Miss* v.1; but other formations (likewise from the OTeut. **misso-*) seem to have coalesced with this. In the sense of 'loss' (branch I) the word may partly represent OE. **mis* neut., 'absence, loss' (Sweet *Anglo-Saxon Dict.*), or be ad. ON. *missi-r* masc. or *missa* fem., 'loss'. In some of the earlier examples of branch II (fault, mistake) the word appears to have been evolved (like *Mis adv.*) from the resolution of compounds of *Mis-* prefix¹; of similar origin are MHG., MLG., MDu. *mis* mistake, ill-success, Du. *mis* error. In the sense of 'missing a mark', etc. (branch III) it has not been found earlier than the 16th c., and may be purely a late formation on the verb; cf., however, early mod. Du. *mis* 'vanus ictus, jactus' (Kilian), which was developed from the adverbial use in *mis* slaan, to miss one's stroke. Cf. also ON. *á mis* adv., so as to miss or fail to meet, whence the ME. *on mis* (see 4 below), later *AMISS adv.*, is prob. adopted.]

Miss (mis), sb.² [Shortening of *MISTRESS*.]

Probably this oral shortening may have been suggested by the written abbreviations 'Mis.' and 'M^{is}' (the latter representing the spelling *mistris*) which were common in the 16-17th c. In the following quotes it is not quite certain that 'Mis' is not a mere graphic abbreviation.

1606 *Choice, Chance, & Change* G 4 My Mistresse... did thus salute me. Servante good morrow, what abroad so earlie? ... mistris quoth I, shall the servant bee in bed after his M^{is}? *ibid.* H 2, If your mistris have a fine wit, and your wife, but a plaine understanding... if your mis. be kind and your wife dogged: wil you loue your mis. better then your wife?

Six missees had, beside his lawful wife.' *Fig.* 1678 *BUTLER Hud.* III. i. 969 (1694) 51 Our Money's now become the Miss Of all your Lives and Services.

2. Prefixed as a title to the name of an unmarried woman or girl (not entitled to the prefix 'lady' or some higher designation of rank).

In modern use, when *Miss* is prefixed to the surname alone, e. g. *Miss Smith*, it normally indicates the eldest (unmarried) daughter of the family; in referring to the others the Christian name is employed, e. g. *Miss Ethel (Smith)*. (But for reasons of convenience the Christian names are often inserted or omitted without regard to this rule.) When the title is applied to several persons of the same name at once, usage sanctions two forms, viz. *the Misses Smith* and *the Miss Smiths*, the former being regarded as grammatically the more proper.

1666-7 *Pearls Diary* 7 Mar., Little Miss Davis did dance a jigge after the end of the play. 1670 *FLECKNOE Epigr.* 43 To Miss Davies, On her excellent dancing. Dear Miss, Who would not think [etc.]. 1697 *VANBRUGH Relapse* iv. 1, Enter Miss Hoyden, and Nurse. c 1700 *FARGHAR Love & a Bottle* Epil., Oh Collier! ELIOT in Cross Life* III. 112 The Miss Gaskells were staying with them. 1880 *Theatre* Feb. 118 As Adriano Miss Josephine Yorke looked and sang admirably.

c. A lady entitled to be addressed as 'Miss'—'. 1840 *Hood Kilnmanse, Marriage* xlii, The Bride, who came from her Coach a Miss, As a Countess walk'd to her carriage.

3. With ellipsis of the proper name. Not now in educated use. a. Without article, substituted for the name of a young unmarried lady, often equivalent to 'the daughter of the house', 'the young lady of the family'.

1695 *CONGREVE Love for L.* II. x. c. In angry or contemptuous use.

1906 *WRYMAN Chippinge* xxii, [A mother says] 'You hate me!' 'Oh no, no!' the girl cried in distress. 'You do, miss!'

4. A young unmarried woman; a girl, esp. a schoolgirl, or one who has lately left school; in modern use, often connoting the squeamishness or sentimentality characteristic of girls of such an age.

In literary English use now only playful or contemptuous; in trade use (distinguished from *ladies* and *children*, with reference to sizes or styles of articles of clothing), *misses* denotes girls of from about 10 to 17 years of age. The American dict. describe the word as being in colloquial and trade use.

1. Used as a title of courtesy prefixed to the surname or Christian name of a man (not entitled to be addressed as 'Sir' or 'Lord'), and to designations of office or occupation.

The word in mod. use may be best described as the oral equivalent of the written prefix *Mr.* (q.v. in its alphabetical place). In writing, the unabbreviated form is now used only with more or less of jocular intention; in a passage like quot. 1854 in d, most persons would now write 'Mr.' (with inverted commas).

1. Originally, a Flemish copper coin of very small value; according to some early Flemish writers, worth 1/3 of a Flemish penny, though other, chiefly smaller, values are also mentioned. In Eng. use mainly as a proverbial expression for an extremely small unit of money value. In books of commercial arithmetic in 16-17th c. it commonly appears as the lowest denomination of English money of account, usually 1/3d, but sometimes 1/4d, and sometimes 1/2d; it is, however, unlikely that the word was ever in Eng. mercantile use. From the 14th c. *mite* has been the usual rendering (though the Wyclif versions have 'mynutis') of L. *minutium* (Vulg.), Gr. *λεπρόν* in Mark xii. 43, where two 'mites' are stated to make a 'farthing' (Gr. *κοδράντης*, L. *quadrans*); hence the word is now popularly taken as equivalent to 'half-farthing'.

2. A sacerdotal head-dress.

a. Hebrew Antiq. Used (after L. *mitra*, Vulg., and *μίτρα*, LXX.) for the ceremonial turban of the high priest (Heb. מִצְנֶפֶת *miznepheth*, אֵיזָן *ēzān*); also (in Wyclif and the Douay Bible, though not in the other versions) for the head-dress of the ordinary priests (Heb. מִנְיָה *minyah*). Coverdale and the Bible of 1611 'bonnet', 1834 Revised 'headtire'.

For the 'mitre' of the English Bible of 1611 the Vulgate has *cidaris* or *tiara* (*mitra* only in Exod. xxxix); its *mitra* is the 'bonnet' of the English Bible. Wyclif's rendering of *cidaris* by 'mytre' is noteworthy, as probably indicating that the word was already current in English (in sense x b). 1382 Wyclif *Lev.* xvi. 4 He [*sc.* Aaron] shal be gyrd-with a linnen gyrdill, and a linnen mytre he shal putte to the heed. — *Zech.* iii. 5 Putte 3e a cleane cappe or mytre [1535 COVERDALE a fayre mytre, 1611 a faire mytre, 1884 Revised] a fair mytre (*unigen*, or turban) vpon his heued. 1398 TAEVISA *Barth.* De P. b. Eccl. A head-dress forming part of the insignia of a bishop in the Western Church, and worn also by certain abbots and other ecclesiastics as a mark of exceptional dignity. In its modern form, it is a tall cap, deeply cleft at the top, the outline of the front and back having the shape of a pointed arch; the material has usually been white linen or satin, embroidered and often jewelled; but mitres of gold or silver have also been used.

The application of *mitra* in med. l. to the episcopal head-dress was doubtless suggested by its occurrence in the description of the attire of the Jewish high-priest. (See a.)

In the Anglican church after the Reformation, the mitre, though theoretically part of the episcopal insignia, was seldom actually worn except at coronations down to that of George III. In recent times some bishops have revived its use on special ceremonial occasions.

Mitre (μάιτρα), sb.² Also *miter*. [Of somewhat uncertain origin: perh., as is usually assumed, a transferred use of prec., but the development of sense is not easy to explain.]

Possibly there may be a reference to the early form of the episcopal mitre, which had a vertical band bisecting a rectilinear angle at the top.]

1. In joinery and other mechanical arts: A joint (also *mitre-joint*) in which the line or plane of junction makes an angle of 45° with the side of each of the two pieces joined, so that the adjacent sides meet in a right angle; the shaped end or edge of a piece of material intended to form such a joint with another; an angle or slope of 45°. Now sometimes applied to any joint in which the angle made by the sides of the joined pieces is bisected by the line of junction.

Mix (miks), v. Pa. t. and pa. pple. *mixed* (mikt). [Back-formation from the ppl. adj. *mixt* (see *MIXED ppl.* a.), a. F. *mixte*, ad. L. *mixtus*, pa. pple. of *miscere* to mix. Cf. *MIXT v.*]

Our earliest example of the vb., in any form other than the pa. pple, is of the date 1538, and is was extremely rare until Shakespeare's time. Of the pa. pple. itself, the earliest examples are c 1480 and 1526, the latter year being the date of our first quot. for *Mixt v.* The OE. *miscian* (the alleged by-form **mixian* is spurious) which has generally been assumed to be the source of the present verb, app. did not survive into ME. Only two examples are cited by Toller, and in these the sense seems to be 'to apportion suitably'. The L. *miscere* = 'mix' is f. the Indo-European root **miġh* (=*mek*, *moik*), represented by Skr. *miḡra* (=*miḡro*) mixed, and by many vbs. with the sense 'to mix' in the various langs.: Skr. *miḡsh*, ?Gr. *μίσγειν* (Gr. *μίσγναι* is from the cognate root *miġ*), Welsh *mysgu*, Old Irish *meisc*, Lith. *maisyti*, OS. *miiti* (Russ. *мѣшати*). Whether the OE. *miscian*, OHG. *misgen*, *misken* (MHG. *MLG.* mod. G. *mischen*) is cognate with the Latin or an early WGer. adoption from it, seems doubtful; the absence of the word from Goth., Scandinavian, OS., and Frisian, is an argument in favour of the latter view.]

Mixed, to mixt (miks't), *pp. a.* [Originally *mixt*, *a. F. mixte* (in the AF. law phrase *accoutin mixte* in Britton c. 1290: see sense 1 below), *ad. L. mixtus*: see *MIX v.* The word having the appearance of an Eng. pple in -ed (cf. *blest, blessed, vext, vexed*), the form *mixed* (*myxyd*) came very early into use, and ultimately gave rise to the formation of the vbs. *MIX* and *MIXT*.

The spelling *mixt* in the 17th c. is prob. in most instances merely phonetic, but may sometimes indicate that the writer apprehended the word as an adoption of *L. mixtus* rather than as the pple of an Eng. vb. In recent use this spelling sometimes occurs (*Hist.*) in the legal sense 1, but otherwise it is confined to writers who advocate spelling reform.]

[a. F. *mizaine* (in mod. Fr. *fore-sail*, *foremast*; c 1381 *migeune* in *Hatz. Darm.*), believed to be ad. It. *mezzana* *mizen-sail*; the lt. word is fem. of *mezzano* *mizen-sail*. Cf. Sp. *mesana*, Pg. *mezena* *foresail*, Du. *beaan* (earlier *beane*), G. *besan* (-*mast*, -*segel*) *mizen*.]

The agreement of the use in Eng. and It. suggests that the divergent use in mod. Fr. is not original; the statement that It. *mezzana* originally meant 'main-sail' seems to be merely a conjecture based on the etymological meaning of the word, the precise implication of which is uncertain: some have suggested that it may be 'middle-sail'.

The 16th c. *Musall* (Sc.) and *myssyll* (see quot. c 1515 s.v. *MAIN-MUSALL*) appear to be synonymous, but their relation to this word is obscure.]

C. adj. = MORE *a.*

[In OE. the construction of *mā* with a partitive genitive (see B. 1. 2) was sometimes inconvenient, because the *sb.* which was felt to be virtually the subject or object of the verb, or the regimen of the prep., did not show the nature of this relation by its inflexion. Hence the genitive was occas. replaced by the case in which the *sb.* would have stood if *mā* had been absent, or to express the same thing in another way the *sb.* was placed in apposition with *mā*. In this way *mā* became practically an indeclinable *adj.*]

The sb. cannot well be identified with OE. *mān* wickedness (though the cognate ON. *mein* has the sense of 'hurt'); perhaps its phonetic coincidence with this may be the cause of its being unrecorded in OE. The word has app. no cognates in Teut. or elsewhere, as there seems to be no sufficient ground for etymologically identifying its derivative OE. *mānan* to complain (MEAN v.2) with *mānan* to intend, mean, speak of (MEAN v.1.)

1. Complaint, lamentation; an instance of this, a complaint, lament. Chiefly in phr. *To make (one's) moan*: const. of and with *obj. clause*. Now always apprehended as a transferred use of sense 2. For *to moan one's moan*, see MEAN v.2 1 b.

Mock (mpk), v. Forms: 5 mokken, mokke, moque, 5-6 mokkyn, mok, 5-7 mocke, 6-mock. [ME. *mokken*, *moque*, ad. OF. *moquer* (F. *moquer*) to deride, jeer, a northern dialect form corresp. to the synonymous Pr. *mochar*, It. *mozzare*. According to some scholars, the word represents a popular L. **mucare* to wipe the nose (whence F. *moncher*, It. *macare*), cf. *mucosus* (class. L. *mucosus*; see Mucus). With the OF. (whence the Eng.) transitive use, cf. L. *emungere* to wipe the nose, to cheat. The reflexive use (the only one in mod. Fr.) *se moquer de quelqu'un*, may originally have denoted the derisive gesture imitative of the movement of wiping the nose. In mod. Provencal, according to Mistral, *mouca* means 'to wipe the nose'; 'to strike on the nose', while *se mouca* = F. *se moquer*, and *moucado* means 'a blow on the nose'; 'a humiliation'. Another hypothesis, less plausible semasiologically, would connect the word with Ger. dial. *mucken* to growl, grumble, OHG. *irmucasan* 'mutire' (mod. G. *mucksen* to grumble).]

By some writers used in a wider sense, so as to be applicable to any proposition in which the predicate is affirmed or denied of the subject with any kind of qualification, or which contains an adverb or adverbial phrase. Of a syllogism: Containing a modal proposition as a premiss.

1569 J. SANFORD tr. *Agrippa's Van. Artes* 22 b. And of these doo only approve eight Modes and laugh at Modal propositions. 1697 tr. *Burgersdicius his Logic* i. xxviii. 113 These Enunciations...are Modal; because they not only denounce the Predicate to agree or disagree with the Subject, but also declare the Manner how they both agree and disagree. 1774 REID *Aristotle's Logic* iv. § 6. (1788) 95 In a modal proposition the affirmation or negation is modified. 1827 WHATELY *Logic* ii. iii. (ed. 2) 108 When a hypothetical Conclusion is inferred from a hypothetical Premiss...then the hypothesis (as in Modals) must be considered as part of one of the Terms. 1878 S. H. HOOGSON *Philos. Refl.* I. 368 It has the advantage of exhibiting the derivation of the Modals, as they are called, from the reflective mode of consciousness [etc.].

Modalism (mōdālīz'm). [f. MODAL + -ISM.] The Sabellian doctrine that the distinction in the Trinity is 'modal' only, i.e. that the Father, the Son, and the Holy Spirit are merely three different modes of manifestation of the Divine nature.

1859 SCHAFF *Hist. Chr. Ch.* an. 1-111 202 Sabellian modalism. 1905 W. SANOAV *Crit. 4th Gospel* vii. 244 The language of Ignatius tends to Modalism.

Modalist (mōdālīst). [f. MODAL + -IST.] a. *sb.* One who holds or professes Modalism. b. *quasi-adj.* = MODALISTIC.

1831 I. TAYLOR *Saturday Even.* xxviii. 469 The error of the Modalists and Sabellians. 1897 *Expositor* Dec. 408 Passages...could be understood in a distinctly modalist sense. Hence **Modalistic** a., of or pertaining to the tenets of a Modalist.

Modality (mōdāl'iti). [ad. med.L. *modalitās*, f. *modalis*: see MODAL and -ITY. Cf. *F. modalité*.] 1. The quality or fact of being modal. Also, a modal quality or circumstance; the modal attributes of something; † a question or point relating to mode, manner, or method, and not to substance. Now rare.

a 1617 BAYNE *On Eph.* (1658) 144 Liberty in this sense...contingency, necessity, these are modalities agreeing to effects, as effects are in order to their second causes. 1647 M. HUDSON *Div. Right Govt.* II. iii. 87 Even the temporal part of that promise...was performed exactly in the reality, though not in the Modality thereof. 1656 *Burton's Diary* (1828) I. 44 Shall punctilios and modalities and forms, bind and tie up a Parliament? 1704 NORRIS *Ideal World* II. x. 401 We cannot conceive the modality of any substance as a being distinct from that substance...We cannot conceive a circle as a being distinct from extension whose modality it is. 1825 *New Monthly Mag.* XIV. 474 The resemblance takes its colour from the modalities of thought and feeling of the artist by whom it is sketched.

2. *Logic.* a. In the scholastic logic, the fact of being a modal proposition or syllogism. Also, the particular qualification by the presence of which a proposition is rendered modal.

1628 T. Logic* vii. 70 All these assertions are made with a different degree of certainty or modality.

b. In Kantian and subsequent use, that feature of a judgement which is defined by the class in which it is placed when judgements are classified into problematic, assertory, and apodictic.

This is a development of the older sense 2 a; the distinctive features of 'problematical' and 'apodictic' judgements being 'modalities' in the earlier sense, the term was extended

to apply also to that of 'assertory' judgements. In Kant's classification 'the Categories of modality' are those of possibility and impossibility, existence and non-existence, necessity and contingency; the term is coordinate with Quantity, Quality, and Relation.

1836 PENNY *Cycl.* VI. 368/1 These Categories consist of four primordial classes: 1. quantity, 2. quality, 3. relation, 4. modality; each class containing three Categories. 1884 tr. *Lotze's Logic* 53 What modality have such sentences as these, 'S will be P', 'S ought to be P', 'S may be P', 'S has been P'? No one of them affirms reality, but the unreal which is past in the last is something quite different from that which is permitted, enjoined, or future in the others...If all these shades of meaning had been taken into account, the forms of modality might have been correspondingly increased in number.

3. *Civil Law.* 'The quality of being limited as to time or place of performance, or more loosely, of being suspended by a condition: said of a promise' (*Cent. Dict.* 1890).

Modalize (mōdālīz), *v. rare*—1. [f. MODAL a. + -IZE.] *trans.* To render modal.

1857 A. B. WILSON in *Oxford Ess.* 115 All dogmatic statements must be held to be modalized by greater or less probability.

Modally (mōdālī), *adv.* [f. MODAL + -LY 2.] In a modal respect; with reference to mode or manner.

1647 M. HUDSON *Div. Right Govt.* II. ix. 130 Gods honour and the Kings are not really but only modally and circumstantially different. 1704 NORRIS *Ideal World* II. i. 21 Things that are modally distinct, or distinct by a modal abstraction, that is, whose distinction is owing [etc.]. 1867 FROUDE *Short Stud., Spinoza* (ed. 2) 232 Therefore because things modally distinguished do not quā substance differ from one another there cannot be more than one substance of the same attribute.

Modulus of elasticity: originally applied by Young to the quantity by means of which the amount of longitudinal extension or contraction of a bar of a given material, and the amount of the tension or pressure causing it, may be stated in terms of each other. Now used in a wider sense (see *quot.* 1877).

THOMSON in *Encycl. Brit.* VII. 804 *Modulus of Elasticity*. † *Moire* (mwär, mwä, mōr). Also 7 moyre.

[F. *moire*, according to Fr. lexicographers an adoption of some form of Eng. MOHAIR.

The OF. *moire*, the name of some textile fabric mentioned by Chrestien of Troyes (12th c.), is believed to be unconnected with the modern word.]

Originally a kind of watered mohair; afterwards, any textile fabric (but usually silk) to which a watered appearance is given in the process of calendering; a watered or clouded silk.

Moire antique, explained by Fr. lexicographers to mean a watered silk of large pattern, is in Eng. use practically synonymous with *moire*, which is apprehended as a shortened form.

Cf. *F. moistr* to grow mouldy: popular Latin *moistr*, class. *L. mūcidus*; also *Rumonsch musch wet*, Friuli *mūcid*, class. *L. mūcidus*; limp. 1. *Physics and Chem.* One of the extremely minute discrete particles of which material substances are conceived to consist. In early use the term was employed somewhat vaguely; in modern chemistry the molecules of any element or compound are assumed to be of uniform size and mass, representing the smallest portions into which the substance can be divided without losing its chemical identity. (Cf. the earlier MOLECULA.)

b. Applied, with qualifying words, to certain functions serving as the measure of some mechanical effect the quantity of which depends on two different factors.

Thus the *moment of a force* or a *velocity* about a point is the product of the length of the directed line representing the force or the velocity, multiplied by the length of the perpendicular from the point. The *moment of a couple* is the product of either of the two equal forces into the length of the arm. The *moment of inertia* of a body about any axis is the sum of the products of the mass of each particle of the body into the square of its least distance from the axis. *Moment of momentum* of a rotating body is the product of momentum into the distance from the axis.

1830 *KATER & LARONER Mech.* x. 135 The moment of a force is therefore found by multiplying the force by its lever-age. *Ibid.* 137 The product of the numerical expressions for the mass of the body and the square of the radius of gyration... has been called the moment of inertia. 1858 *RANKING Man. Assent* l. iv. 49 But of the Supreme Being it is safer to use the word 'monad' than unit.

2. An ultimate unit of being; an absolutely simple entity.

Chiefly used with reference to the philosophy of Leibniz (1646-1716), according to which the universe of existence consists of entities without parts, extension, or figure; and possessing, in infinitely various degrees, the power of perception. Those among these 'monads' which have the perceptive power in the higher degrees are souls; the rest are formed in the view of the percipient mind into aggregates, which constitute bodies. The term was adopted by Leibniz from Giordano Bruno (d. 1600), with whom the 'monad' has the twofold aspect of a material atom and an ultimate element of psychical existence.

1748 HARTLEY *Observ. Man* ii. i. 27 No Sensation can be a Monad, inasmuch as the most simple are infinitely divisible in respect of Time. 1785 REID *Intell. Powers* iii. iv. 345 A person is something indivisible, and is what Leibniz calls a monad. 1856 SIR B. BRODIE *Psychol. Inq.* i. ii. 38 The conscious indivisible monad which I feel myself to be. 1874 MORRIS tr. *Ueberweg's Hist. Philos.* § 111 II. 27 Bruno opposes the doctrine of a dualism of matter and form... The elementary parts of all that exists are the minima or monads... they are at once psychical and material. The soul is a monad... God is the monad of monads. 1879 HUXLEY *Hume* iii. 8 The possibility that the mind is a Leibnizian monad. 1891 *Transf. 1862 Q. Rev.* Apr. 402 The wealth, the might... of the British empire are due not to the mere aggregation and activity of monads or units of mankind [etc.].

3. Biol. A hypothetical simple organism, assumed in evolutionary speculations as the first term in the genealogy of living beings, or regarded as associated with a multitude of similar organisms to form an animal or vegetable body.

Intro. 24 Thus [according to Lamarck], by consequence, in the lapse of ages a monad becomes a man [!]. 1847 TULI tr. *Öken's Physio-philos.* 570 Decomposition is a separation into Monads, a retrogression into the primary mass of the animal kingdom. 1851 H. 4. Zool. A protozoon of the genus *Monas*, or, more widely, of the order *Monadidea* or the class *Flagellata*.

Monarchian (mɒnɑːkiən), *sb.* and *a.* *Ecll. Hist.* [ad. late L. *monarchianus* pl., f. *monarchia*: see MONARCHY and -AN.]

The term *monarchianus* is merely a nickname applied by Tertullian (*Adv. A. sb. One of those heretics in the 2nd and 3rd centuries who denied the doctrine of the Trinity.

Modern historians distinguish between 'Dynamicist' or 'Adoptionist' Monarchians, who regarded Christ as a man endowed with Divine power, and 'Modalistic' Monarchians, who maintained that He was an incarnation of God the Father.

Monism (mɒnɪz'm). [ad. mod. L. *monism-us*, f. Gr. *mónos* single: see -ISM.]

1. *Philos.* A metaphysical system based on the assumption of a single ultimate principle or kind of being instead of two or more: opposed to DUALISM and PLURALISM in various applications.

a. The doctrine that only one being exists. 1862 F. HALL *Hindu Philos. Syst.* 160 To the Vedāntins the establishment of monism, or non-duality, is most essential. They wish to make out the soul to be Brahma, and the world to be false; whence it would follow, that Brahma solely is true, and that nought but him exists.

b. A general name for those theories which deny the duality (i.e. the existence as two ultimate kinds of substance) of matter and mind.

Thus materialism and idealism or spiritualism are both species of monism; the name, however, is often applied specifically to a third variety, viz. the doctrine that physical and psychical phenomena are alike manifestations of a reality which cannot be identified with either matter or mind.

1866 tr. *Hackel's Hist. Creat.* l. ii. 35 The Monism here maintained by us is often considered identical with Materialism. 1887 *Encycl. Brit.* XXII. 564/1. Until dualism had been thought out, as in the Peripatetic school, it was impossible that monism (or at any rate materialistic monism) could be definitely and consciously maintained. 1898 ILLINGWORTH *Div. Inman.* iii. 71 Monism, started from the physical side, from analysis of the cerebral conditions of thought.

c. The doctrine that there is only one Supreme Being, as opposed to the belief in a Good and an Evil Principle as co-ordinate powers.

1872 MORRIS tr. *Ueberweg's Hist. Philos.* I. 334 Against the dualism of the Manichæans. Augustine defended the monism of the good principle.

In accordance with its etymology, *monachus* originally meant a religious hermit or solitary, but was from an early period applied to canobites, and this eventually became the ordinary use.]

1. A member of a community or brotherhood of men living apart from the world under the vows of poverty, chastity, and obedience, according to a rule (characteristic of the particular order), and devoted chiefly to the performance of religious duties and the contemplative life. The different orders of monks are distinguished by habits of various shapes and colours (cf. b).

In England, before the Reformation, the term was not applied to the members of the mendicant orders, who were always called *friars*. From the 16th c. to the 19th c., however, it was usual to speak of the friars as a class of monks. In recent times the distinction between the terms has been carefully observed by well-informed writers. In Fr. and Ger. the equivalent of *monk* is applied equally to 'monks' and 'friars'.

The word properly belongs to Christian use, but is sometimes applied to persons of other religions (e.g. Moslems, Buddhists).

The M.L.G. version of *Reynard the Fox* (1498) has (only once, i. 6161) *Monche* as the name of the son of Martin the Ape; and early in the 14th c. the same character is mentioned as *Monkeus* (v. *tr. Monnequin*) by the Hainauter Jean de Condé in *Li Dis d'Entendement* (Scheele) 853 (the passage is also printed by Chabaille as a 'branche' of the *Roman du Renart*). As the name does not occur in any other version of *Reynard*, the Eng. word can hardly be derived from the story. But it is not unlikely that the proper name may represent an otherwise unrecorded M.L.G. **monke*, M.Du. **monnekin*, a colloquial word for monkey, and that this may have been brought to England by showmen from the continent. The M.L.G. and M.Du. word would appear to be a dim. (with suffix *-ke*, *-kijn*: see *-KIN*) of some form of the Rom. word which appears as early mod.F. *monne* (16-17th c.), It. *monna* (earlier *mona*), Sp. *pg. mona*, mod.Fr. *monno* female ape (a masc. *monno* occurs in Sp. and Pg.), whence the diminutive forms, early mod.F. *monique*, It. *moninno* and **monicchio* (Florida). The origin of the Rom. word has not been discovered.]

1. The simian animal, and transferred uses.

I. In its widest application, an animal of any species of the group of mammals closely allied to and resembling man, and ranging from the anthropoid ape to the marmosets; any animal of the order *Primates* except man and the lemurs. In a more restricted sense, the term is taken to exclude the anthropoid apes, and the baboons; in popular use associated chiefly with the greenish long-tailed species having cheek-pouches, often kept as pets.

By some writers, the word *ape* is used to express the wider of the two senses above explained, and *monkey* is confined to its narrower application. Others employ *monkey* as the wider term, restricting *ape* to the tailless and especially the anthropoid 'monkeys'.

Mononyplies, variant of MONYPLIES.

Mon- (mōno, mōno), before a vowel often mon-, repr. Gr. *mono-*, combining form of *μῑνος*, alone, only, sole, single, occurring in a number of words adopted from existing Greek compounds (as MONARCH, MONODY, MONOGAMY, MONOGRAM, MONOLOGUE, MONOPOLY), and hence used to form words, mostly scientific and technical, independently of a Greek original. The second element of these words is normally of Greek origin, but in recent formations *mono-* is often combined (instead of UNI-) with a Latin element (as *monocellular*: see also 2 below), and occas. prefixed to an English word (as MONOLINE, MONO-RAIL). A measure of time corresponding to the period of revolution of the moon.

1. Any one of the twelve portions into which the conventional year is divided. (When not otherwise determined by the context, the reference is to the 'months' inherited by Western civilized nations from the Romans, and known by the names January, February, etc.) More explicitly *calendar month*, less commonly † *calendar*, *civil*, *political*, *usual month* (for illustrations of these designations see under the adjs.).

The primitive calendar month of ancient nations began on the day of new moon or the day after, and thus coincided (except for fractions of a day) with the synodical month (see 2). Among many peoples of antiquity, however, it was from a very early period found desirable that the calendar year should contain an integral number of the smaller periods used in ordinary reckoning. Hence the true 'months' were superseded by a series of twelve periods each having a fixed number of days (on the average one-twelfth of the number in the calendar year), and thus having no relation to the changes of the moon; but this artificial period continued to bear the name of 'month'. The systems according to which the reckoning by months was brought into relation with that by years were very various. In the Julian calendar, the months in leap year had alternately 31 and 30 days, while in other years February had only 29 instead of 30. This symmetrical arrangement was under Augustus broken up by the transference of a day from February to August, and of a day from September and November to October and December respectively, producing the system now in use.

2. *Astr.* a. (In full *Lunar month*.) The period in which the moon makes a complete revolution relatively to some point, either fixed or moveable.

There are thus several species of lunar month, as the time of the revolution is different according to the point with regard to which it is reckoned. Usually the term denotes the *synodical month*, i. e. the period from one new moon to the next, the length of which is 29 days, 12 hours, 44 minutes, 2.7 seconds. The other kinds of lunar month (the lengths of which are all between 27 and 28 days) are the *anomalistic*, *sideral*, *tropical*, and *nodical month*: see those adjs.
